CERTIFICATE OF CONTINUOUS EVALUATION
for
RANDOM NUMBER GENERATOR & ASSOCIATED COMPONENTS

January 2008

Random number generator and shuffling

The random number generator (RNG) and shuffling algorithms used to create outcomes for multi-player poker are components of PKR Limited's systems. The RNG has been evaluated by Gaming Associates. At the time of evaluation, and during the month of January 2008, the RNG was used to provide appropriately shuffled cards for poker games.

The evaluation comprising statistical testing and code inspection found that:

- ♠ the RNG generated results which were uniformly distributed and statistically independent; and
- ♠ card results for the *Texas Holdem* and *Omaha* games were fair and not predictable.

Gaming Associates has verified that the RNG in use is identical to the RNG evaluated and the RNG and shuffling algorithms are continuing to perform as designed and evaluated throughout the month of January 2008.

Disclaimer

Gaming Associates has conducted a level of evaluation, which is over and above that which is required by the Alderney Gambling Control Commission. This continuous certification relates to laboratory and actual site evaluation and analysis. Gaming Associates is independent of, and does not control, the actual gaming site.
